

TEED 522 Technology Strand

An assignment to make up the missed morning (2-09-2009)

Go to our wiki page: <http://teed522assessment.wikispaces.com/> and click on "Tech Resources," under **Navigation**, over on the left side of the page.

There you will find a link to a pdf document, "Station Description." This document contains brief descriptions of the "Web Resources" and "Gadgets" that we were to have explored in a stations format in this morning's class.

The Web Resources are:

- CyberSchoolBus;
- American Memory Project;
- Thomas;
- ZipSkinny;
- TeacherTube;
- GlobalSchoolNet;
- In Our Time;
- Stanford University on iTunes U;
- Newseum, and
- NiceNet.

The Gadgets are:

- Data Probes (temperature, light, heart rate, and soil moisture);
- Sound Level Meter;
- iTalk microphone for an iPod;
- Olympus Digital Voice Recorder;
- Smart Board.

Your job is to pick five of these and spend 15 – 20 minutes investigating each of the five. Then, for three of the five, respond to the two questions below.

1.) Web Resource or Gadget: _____

2.) What is one learning target that might be addressed with the use of this Web resource or gadget? [Do classify your target (fact, concept, etc.). No EALR / Standard necessary]

Please e-mail your responses to me by Friday, 2-13-2009.
